introduction

typography I is the first of three courses that cover the fundamentals of typographic practice, both as a technical skill and an expressive medium.

typography, the physical shaping of language, resides at the center of the discipline of graphic design.

this course introduces the basic principles of typography, its theory, practice, technology, and history through the study of letterforms, page composition, proportion, hierarchy, contrast, type identification and classification, and questions of legibility and aesthetics.

this is a process book or a portfolio of typographic explorations chronicling a semester of design + work.

monogram

anatomy of the letter form

the monogram is the unification of letterforms to create a new form.

the use of these marks dates back to Roman times and likely before. For example, one of the first renowned monograms was Albrecht Dürer (1471–1528) to mark his original prints

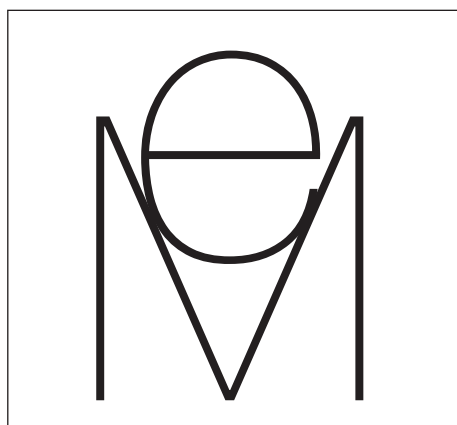

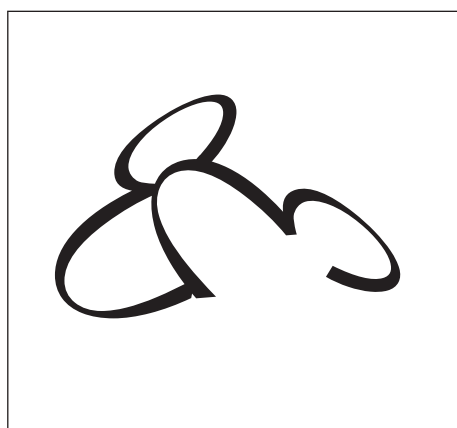

“types and symbols of approaches”, reads “a monogram is a sign composed of two letters (in the case of more letters it is technically called a “seal”) that are combined.

this project aided development towards sensitivity to relationships of typographic form to content.

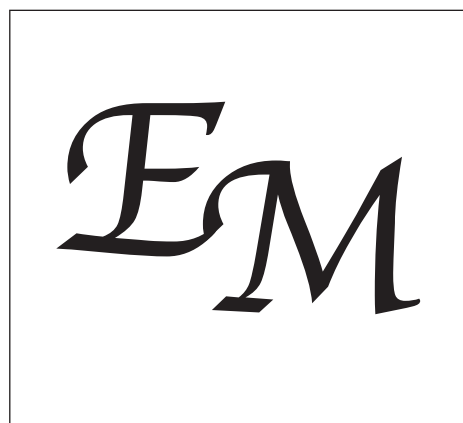

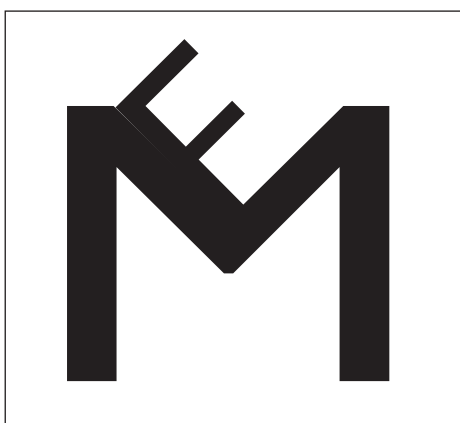

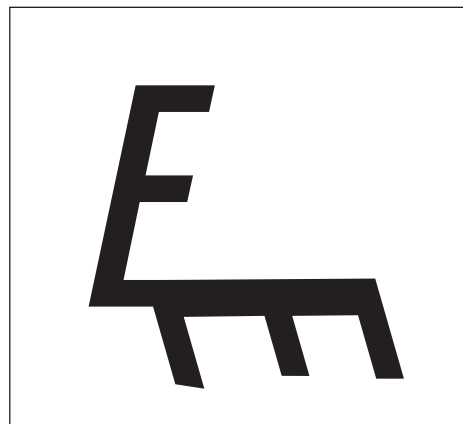

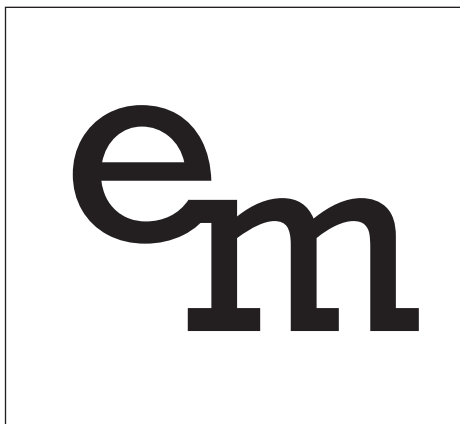

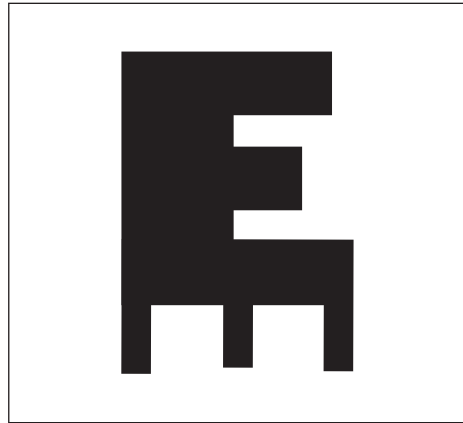

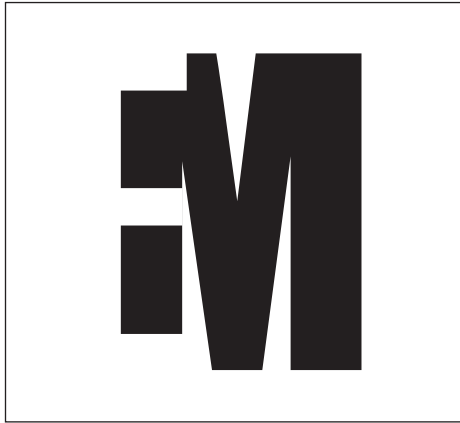

example of successful monogram design

explorations

monogram of my initials

monogram of my initials

monogram of my initials

through this process, learning that a monogram is not created by the casual arrangement of some letters but rather the study of particular superimpositions and connections between them to obtain a form.

form & counterform

intro to logo-type design

by combining a white letterform or a white numeral on top of a black, solid shape such as circle, square, triangle, further noticing either contrasting or uniform qualities between the letter and the black shape through this project.

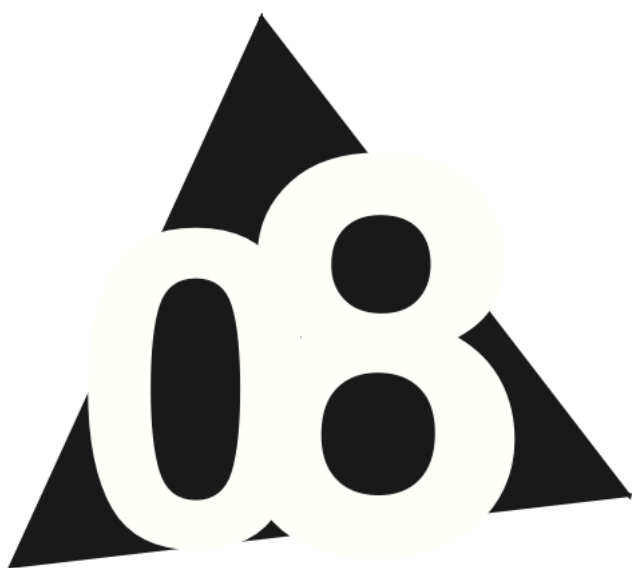

followed by exploring different placements, considering bleeds, becoming aware of unique situations wherein, in some circumstances, the character's identity is barely recognizable, even transformed into another identity.

learning through this project that letterform extends beyond the shape boundaries.

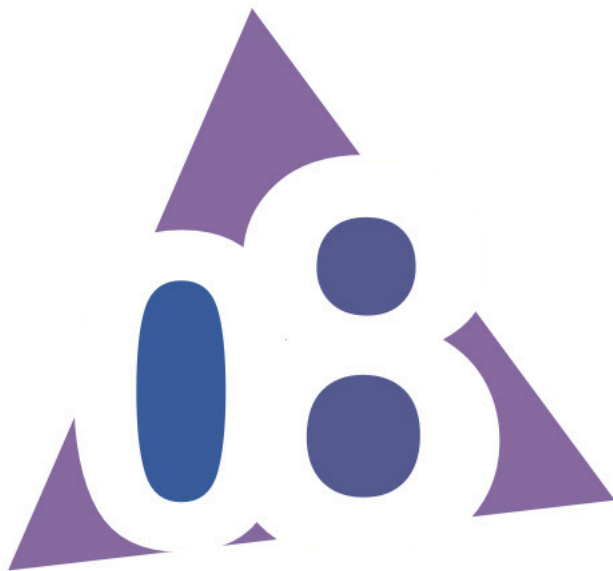

example of successful monogram design

final outcome

black and white counterforms exploration

the experimentation of layering white letters or numerals on black shapes to explore contrasts, uniformity, and how placement can alter or obscure the letter's identity.

colored counterforms exploration

being able to discover the most effective ratio between shape and letter/numeral, varying sizes and documenting results, analyzing the most effective proportions between the shapes and characters, as well as adding color.

explorations

colored counterforms exploration

being able to investigate the relationship of form and counter form in a few selected letterforms and numerals of the Latin alphabet which, consist of closed-in counter form through this project.

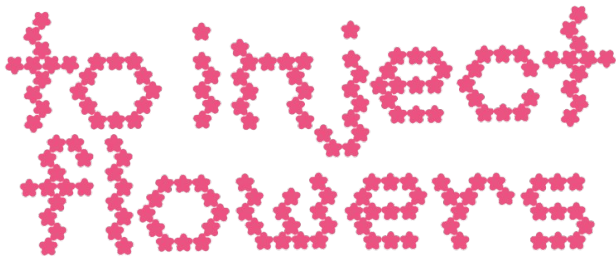

modular typeface

letterform construction

the graphic design profession in the Western Hemisphere has strong ties with its writing system, the Latin alphabet.

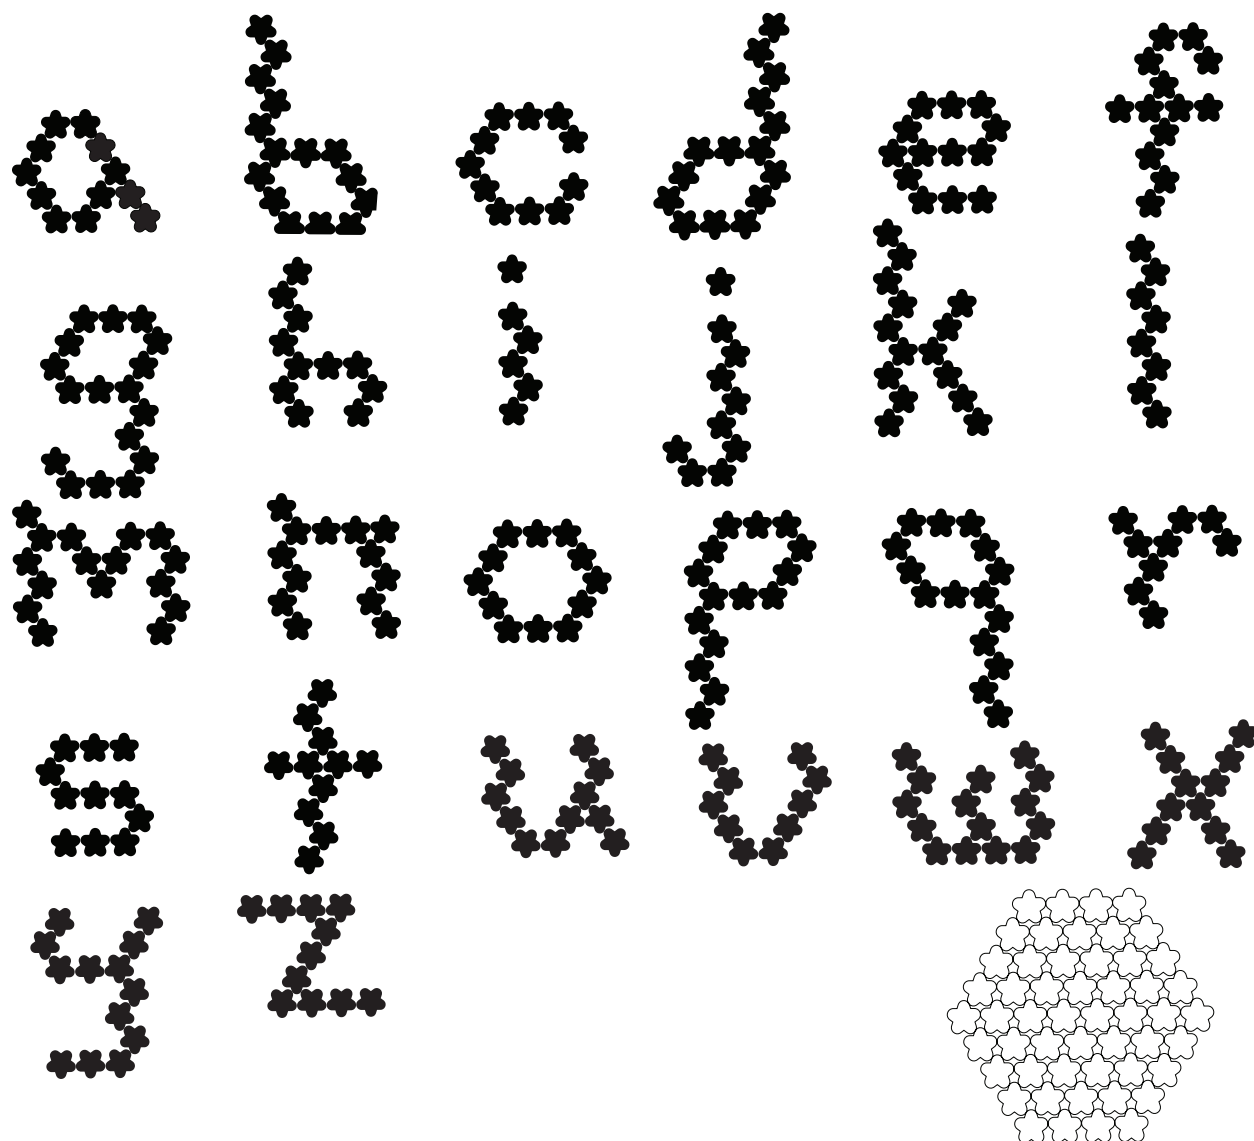

by looking at the development of our writing system since the hieroglyphs, one can witness a gradual simplification of form.

through this process, it is this simplifying, reducing, and abstracting of information, which is one of the main criteria in the language of graphic design.

modular alphabet design for mockup

final outcome

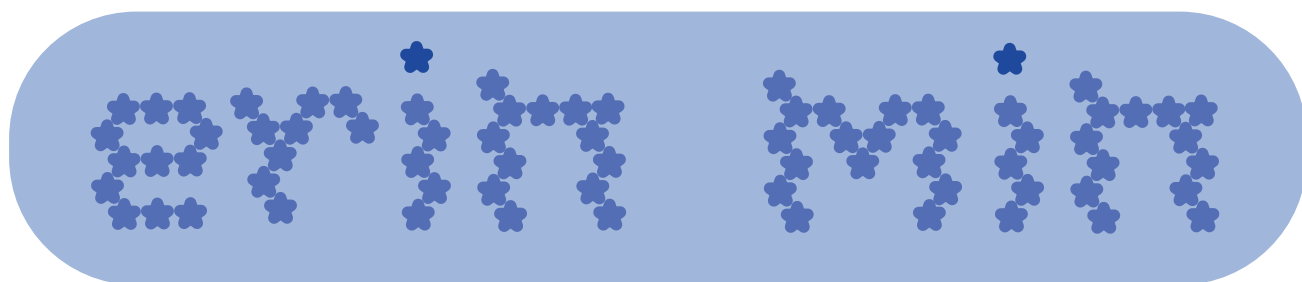

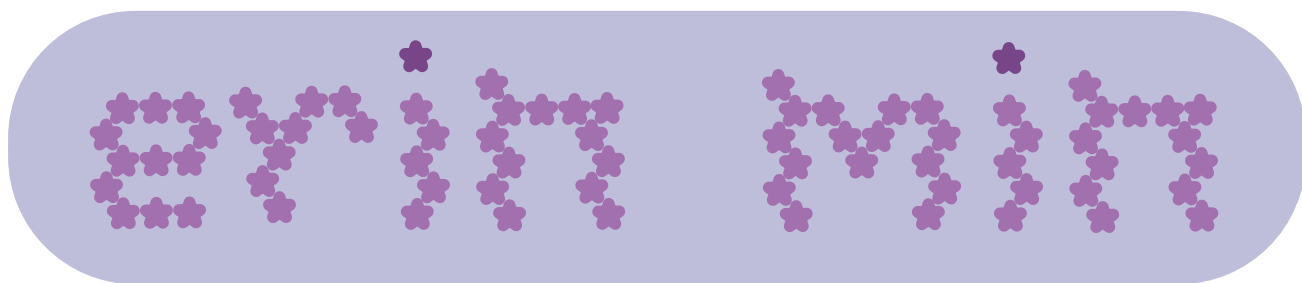

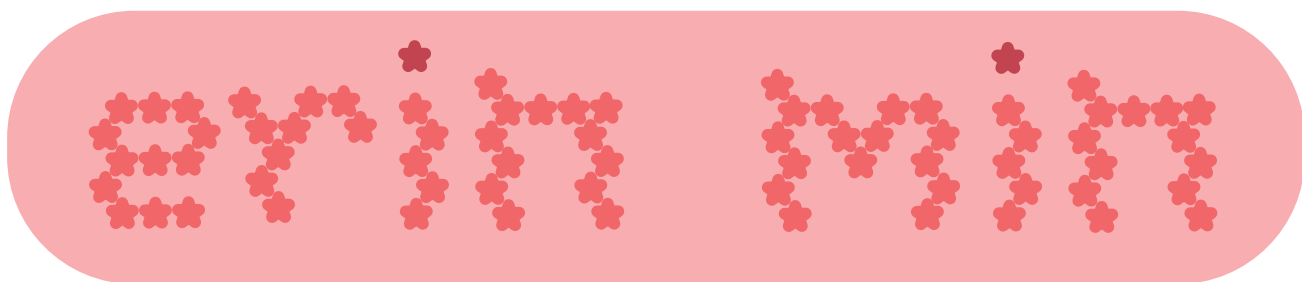

final modular alphabet with grid

designing a Latin alphabet lower case based on a system a flower shape grid system.

the organic and feminine qualities of the system is what makes it attractive.

explorations

modular alphabet with name

creating a modular alphabet and
spell my name as well as coloring it
and making it as an logo/ sticker.

flower packaging mockup with modular alphabet

creating mockups on flower packaging products as it compliments the writing system.

the assignment aided the ability to develop and design a functional writing system.

animated billboard

typographic animation display

animation as an effect occurs during the moment of change between frames, one must create motion through synthetic means.

creating a typographic animation from still artboards frames alerting the public of Covid-19.

this project aids the understanding about how the eye and mind can create type and color blending from still images.

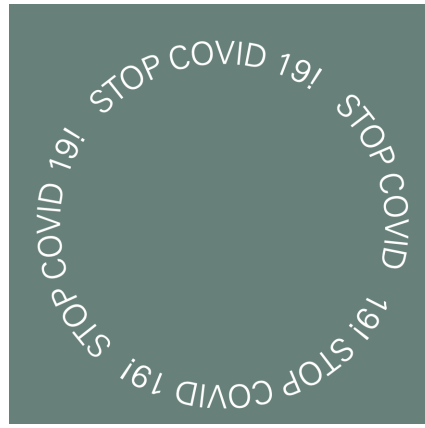

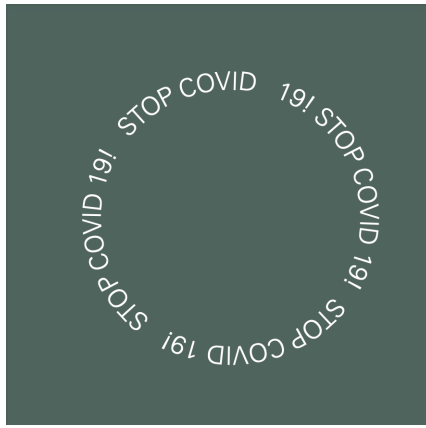

still sequence frame of final animation

final outcome

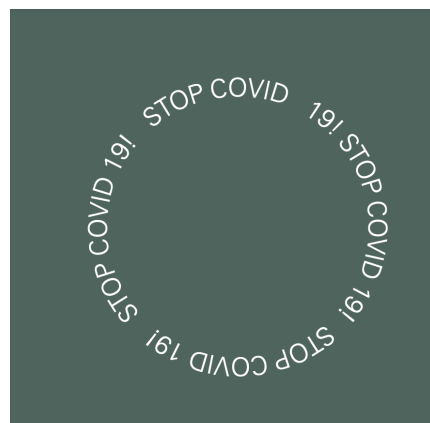

frame sequences of final animation

color gradation for final animation

experimenting with color mixing and color gradation.

creating a series of 100 still images (artboards) that produce this effect.

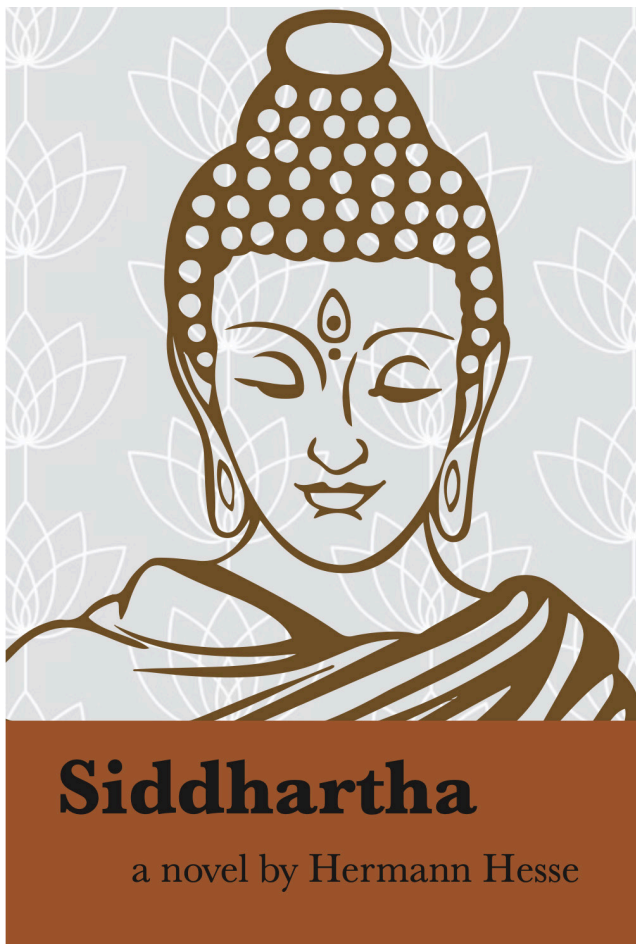

frame sequences of final animation

typesetting basics

publication design practice

using 'Siddhartha,' a novel by Hermann Hesse, designing the components of a story.

developing the Half Title page, the title page, Copyright and ISBN page, Table of Contents, Preface, Chapter Number One and Two in its entirety, Folios (page numbers), and Running Heads.

cover design of 'Siddhartha' a novel

THE SON OF THE BRAHMAN

In the shade of the house, in the sunshine of the riverbank near the boats, in the shade of the Sal-wood forest, in the shade of the fig tree is where Siddhartha grew up, the handsome son of the Brahman, the young falcon, together with his friend Govinda, son of a Brahman. The sun tanned his light shoulders by the banks of the river when bathing, performing the sacred ablutions, the sacred offerings. In the mango grove, shade poured into his black eyes, when playing as a boy, when his mother sang, when the sacred offerings were made, when his father, the scholar, taught him, when the wise men talked. For a long time, Siddhartha had been partaking in the discussions of the wise men, practising debate with Govinda, practising with Govinda the art of reflection, the service of meditation. He already knew how to speak the Om silently, the word of words, to speak it silently into himself while inhaling, to speak it silently out of himself while exhaling, with all the concentration of his soul, the forehead surrounded by the glow of the clear-thinking spirit. He already knew to feel Atman in the depths of his being, indestructible, one with the universe.

Joy leapt in his father's heart for his son who was quick to learn, thirsty for knowledge; he saw him growing up to become great wise man and priest, a prince among the Brahmins.

Bliss leapt in his mother's breast when she saw him, when she saw him walking, when she saw him sit down and get up, Siddhartha, strong, handsome, he who was walking on slender legs, greeting her with perfect respect.

Love touched the hearts of the Brahmins' young daughters when Siddhartha walked through the lanes of the town with the luminous forehead, with the eye of a king, with his slim hips.

But more than all the others he was loved by Govinda, his friend, the son of a Brahman. He loved Siddhartha's eye and sweet voice, he loved his walk and the perfect decency of his movements, he loved everything Siddhartha did and said and what he loved most was his spirit, his transcendent, fiery thoughts, his ardent will, his high calling. Govinda knew: he would not become a common Brahman, not a lazy official in charge of offerings; not a greedy merchant with magic spells; not a vain, vacuous speaker; not a mean, deceitful priest; and also not a decent, stupid sheep in the herd of the many. No, and he, Govinda, as well did not want to become one of those, not one of those tens of thousands of Brahmins. He wanted to follow Siddhartha, the beloved, the splendid. And in days to come, when Siddhartha would become a god, when he would join the glorious, then Govinda wanted to follow him as his friend, his companion, his servant, his spear-carrier, his shadow. Siddhartha was thus

loved by everyone. He was a source of joy for everybody, he was a delight for them all.

But he, Siddhartha, was not a source of joy for himself, he found no delight in himself. Walking the rosy paths of the fig tree garden, sitting in the bluish shade of the grove of contemplation, washing his limbs daily in the bath of repentance, sacrificing in the dim shade of the mango forest, his gestures of perfect decency, everyone's love and joy, he still lacked all joy in his heart. Dreams and restless thoughts came into his mind, flowing from the water of the river, sparkling from the stars of the night, melting from the beams of the sun, dreams came to him and a restlessness of the soul, fuming from the sacrifices, breathing forth from the verses of the Rig-Veda, being infused into him, drop by drop, from the teachings of the old Brahmins.

Siddhartha had started to nurse discontent in himself, he had started to feel that the love of his father and the love of his mother, and also the love of his friend, Govinda, would not bring him joy for ever and ever, would not nurse him, feed him, satisfy him. He had started to suspect that his venerable father and his other teachers, that the wise Brahmins had already revealed to him the most and best of their wisdom, that they had already filled his expecting vessel with their richness, and the vessel was not full, the spirit was not content, the soul was not calm, the heart was not satisfied. The ablutions were good, but they were water, they did not wash off the sin, they did not heal the spirit's thirst, they did not relieve the fear in his heart. The sacrifices and the invocation of the gods were excellent—but was that all? Did the sacrifices give a happy fortune? And what about the gods? Was it really Prajapati who had created the world? Was it not the Atman, He, the only one, the singular one? Were the gods not creations, created like me and you, subject to time, mortal? Was it therefore good, was it right, was it meaningful and the highest occupation to make offerings to the gods? For whom else were offerings to be made, who else was to be worshipped but Him, the only one, the Atman? And where was Atman to be found, where did He reside, where did his eternal heart beat, where else but in one's own self, in its innermost part, in its indestructible part, which everyone had in himself? But where, where was this self, this innermost part, this ultimate part? It was not flesh and bone, it was neither thought nor consciousness, thus the wisest ones taught. So, where, where was it? To reach this place, the self, myself, the Atman, there was another way, which was worthwhile looking for? Alas, and nobody showed this way, nobody knew it, not the father, and not the teachers and wise men, not the holy sacrificial songs! They knew everything, the Brahmins and their holy books, they knew everything, they had taken care of everything and of more than everything, the creation of the world, the origin of speech, of food, of inhaling, of exhaling, the arrangement of the senses, the acts of the gods, they knew infinitely much—but was

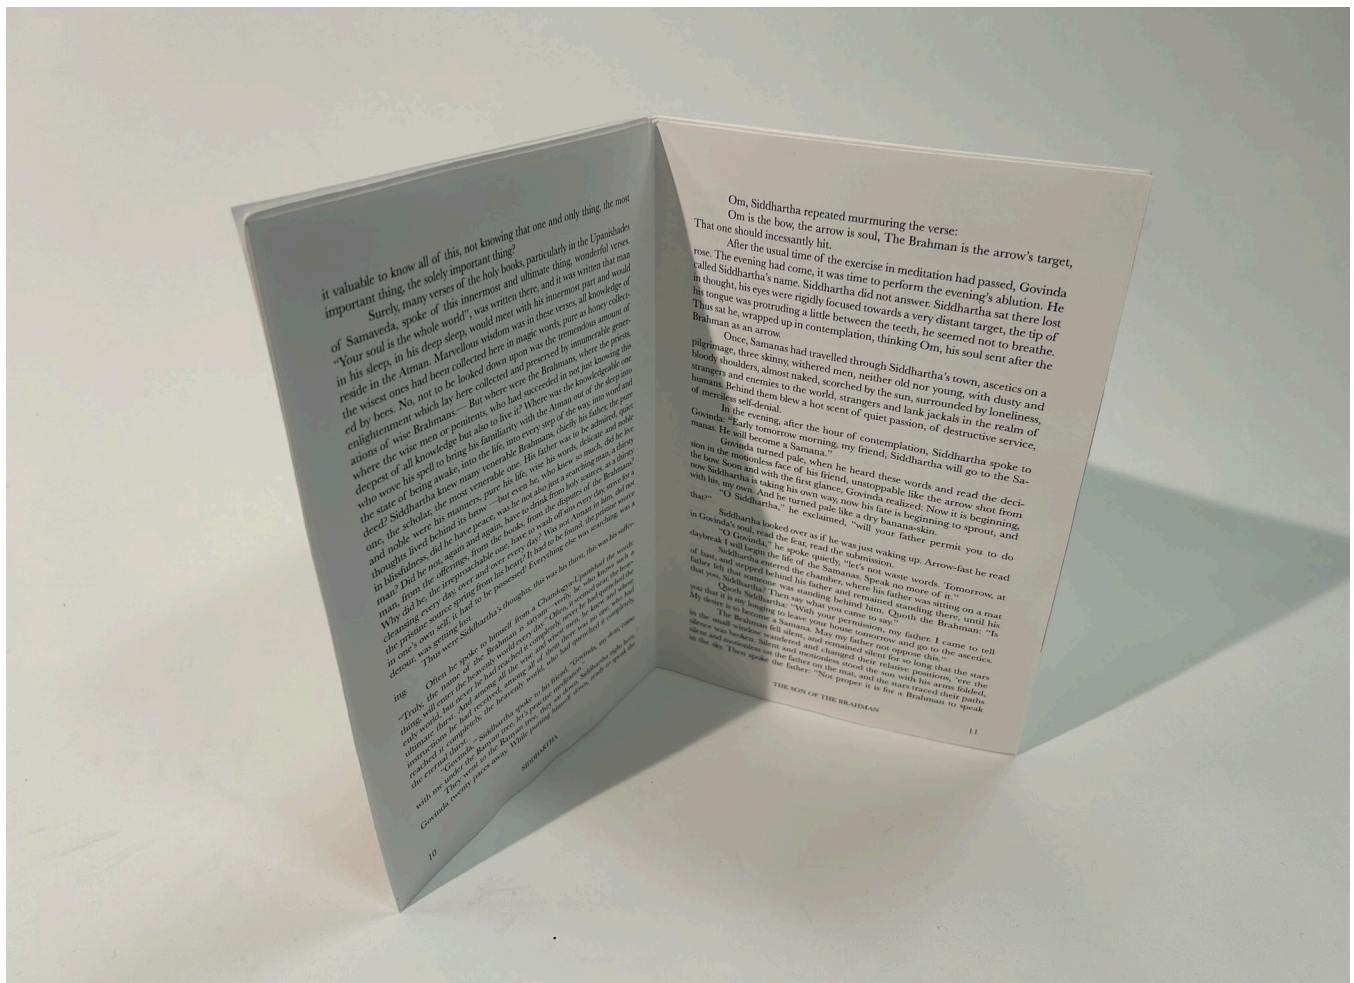

inside of final book design of 'Siddhartha'

through this process, being able to learn the fundamentals of typesetting, formatting text, and structure written information using hierarchical systems.

final book cover of 'Siddhartha'

final booklet printed with the text layout design.

composition basics

typographic tableau design

in the spirit of Constructivism,
create an asymmetric, dynamic
composition with letters, numerals,
and punctuation using a selection
of fonts from the American type
classification.

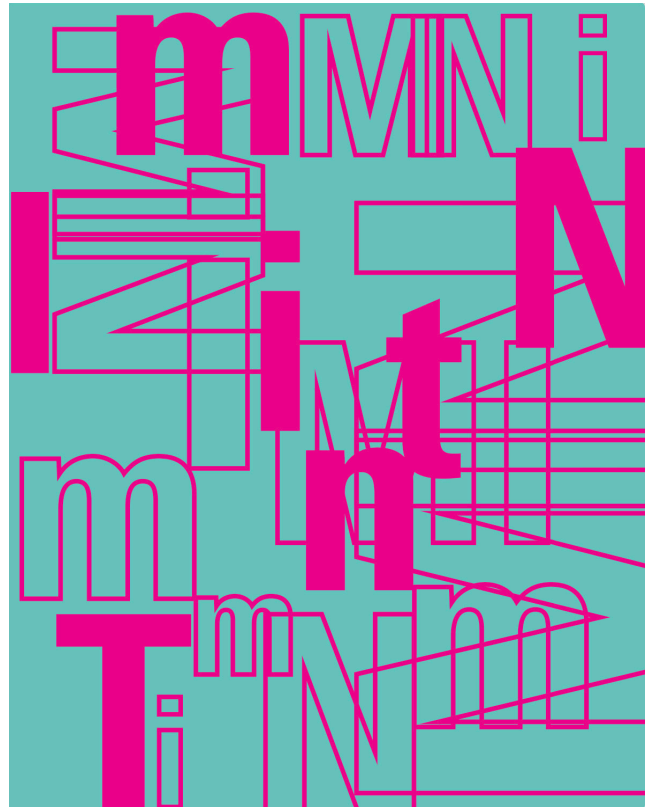

the project may includes fonts from
the American type classification:
Old Style, Transitional, Modern, Slab
Serif, Sans Serif, and Script.

exploration design of my name

black and white with helvetica design

explorations with different fonts and color palette

exploration of gradation with helevetica design

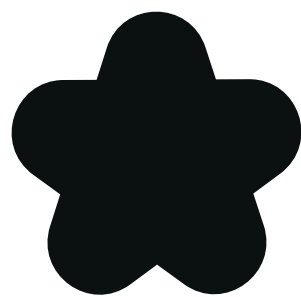

through this process, being able to successfully to understand the vocabulary of the language of aesthetics.
