ERIN MIN

Rhode Island School of Design '27

Graphic Design & Coding

Contacts: erinmin1212@gmail.com

(301) 543-7396

My name is Erin Min, and I am a design student at the Rhode Island School of Design, where I am concentrating in Computation, Technology, and Culture. My practice spans visual identity, editorial design, and coded interactive design. I'm particularly interested in designing around niche, intimate emotions, like nostalgia, quiet longing, soft familiarity, or the subtle comfort of shared cultural memories, creating work that feels personal yet universally recognizable. I have honed my skills in Adobe Creative Suite (Illustrator, InDesign, and After Effects), Figma, and web technologies like HTML, CSS, and JavaScript. I am confident in my ability to develop visual assets for digital campaigns, social media, and web platforms, and understand how to incorporate these assets within the framework of existing brand identities while still bringing innovative visual elements to the table. In addition to my skills and research experience, I am a strong contributor within and outside my academic practices. Within the school, I am responsible for publication design, while I was the web head of RISD/Brown's official magazine, as well as the Art Director for Brown's Health Publication. On weekdays, I participate in a different type of art by being a marketing team member in RISD's TEDx. Outside of school, the most important project I self-initiated was my own exhibition in the summer in South Korea.

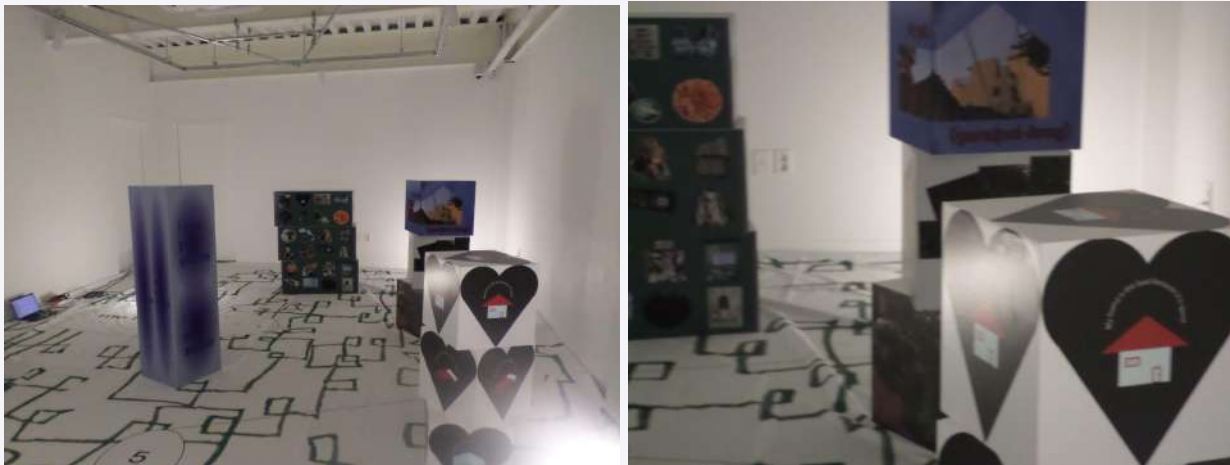

MBFU (Me Before You): Erin Min's First Exhibition

Year: Summer 2025

Medium: Adobe Illustrator, Adobe InDesign

Description: *MBFU* (short for *Me Before U*) began with a poster that established the project's visual identity, using pink tones, illustrated space of bubbles, and interconnected lines to symbolize the weaving of personal and collective stories. This visual language extended into the exhibition, where the poster and accompanying book defined the thematic system and transformed the project into a memorable monument.

MBFU (Me Before You): The Digital Experience

Year: Summer 2025

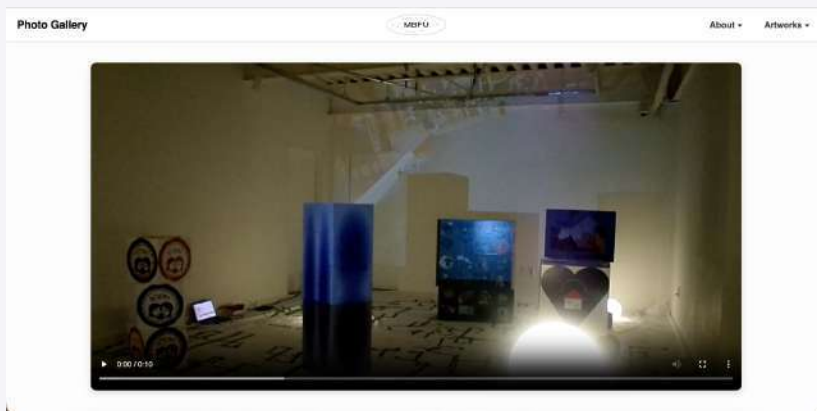

Medium: Visual Studio Code, Github, Polycam

Description: MBFU: The Digital Experience was created for those who could not attend the exhibition in person. The site includes 3D scans of the gallery space, allowing viewers to explore the works and environment as if they were walking through it themselves.

Things that Help Me Sleep a Little Better: a Library of Gratitude

Year: Winter 2025

Medium: HTML, CSS, JavaScript (Coding)

Description: An interactive library of gratitude that houses 100 personal images, each unfolding into a bilingual story in both of my mother tongues (English and Korean). The work transforms fleeting memories into a living monument of emotion and a library of gratitude, guided by the phrase “things that help me fall asleep a little better.”

Ribs, Rites, and Ruptures

Year: Spring 2025

Medium: Adobe InDesign, Butcher Paper, Coptic Stitching

Dimensions: Hand-bound Typography 2 Assignment

Description: A homage on Korean women writers, memory, the body, and resistance. Hand bound with red thread coptic stitching and printed in red text, the design recalls veins, thread as lifeblood, and handcraft as resilience. The butcher paper and layered form honor the raw, layered voices of writers like Kim Hyesoon and Han Kang.

“Take a pic!” Filter

Year: Spring 2025

Medium: Github, HTML and CSS

Description: Using a vintage Microsoft visual language, this filter treats desktop tabs as drifting artifacts of attention. By multiplying and suspending them, it becomes a meditation on how digital presence lingers through what remains open rather than what is closed.

Sanctuary Project

Year: Fall 2025

Medium: Adobe InDesign and Illustrator, HTML and CSS

Dimensions: 4' x 6' for poster cards, 10' x 5' for folder

Description: The Sanctuary Project is a collaborative study of a single bench and the subtle, often overlooked world that forms around it. The project becomes a meditation on sanctuary in the everyday landscape: a collaborative attempt to honor how a simple bench can shape experience, hold presence, and create a space of calm within a constantly shifting environment.

Things you see when you Slow down

Year: Fall 2025

Medium: Adobe InDesign, Perfect Binder, Coptic, Coding

Dimensions: 2.5' x 7'

Description: Slow Language / 느림의 언어 is a publication and digital experience that examines how language and design shape our sense of time. Through a hand-bound scroll and a paired interactive webpage, reading becomes a slow, embodied act defined by rhythm, pause, and attention. By moving between the stillness of paper and the gentle motion of the screen, the project frames language as a temporal landscape—inviting readers to notice silence, breath, and the act of slowing down itself.

Sally's Beauty Mark

Year: Fall 2025

Medium: Adobe InDesign, Perfect Binder, Coptic

Dimensions: Hand-bound publication

Description: Sally's Beauty Mark is a publication that traces the quiet power of a single mark and how a mole becomes a site of culture, memory, femininity, and gaze. Across its pages, the design creates a slow, contemplative rhythm. Therefore, letting the mole function as a metaphor and point of cultural divergence. Sally's Beauty Mark becomes an exploration of how we learn to see ourselves through others.

Memory Test Poster

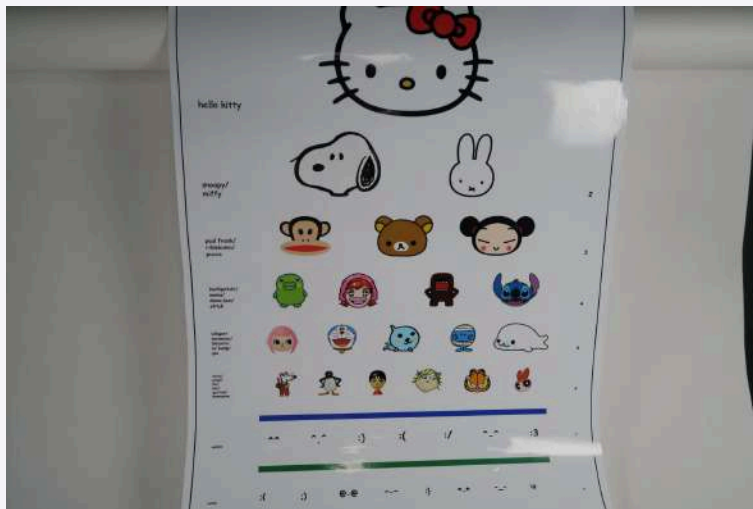

Year: Fall 2025

Medium: Adobe Illustrator

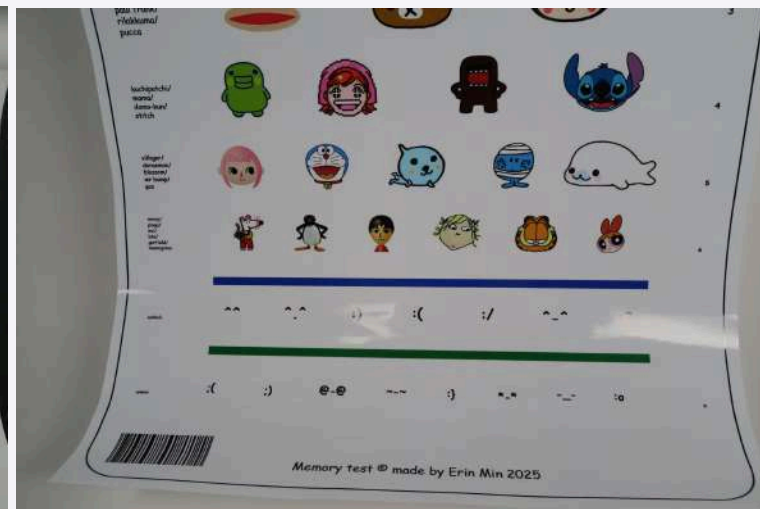

Dimensions: 36' x 24'

Description: The Memory Test Poster takes an ordinary, universal design. By maintaining the eye chart's strict hierarchy, spacing, and scale, the poster preserves its universal clarity while layering recognition, memory, and emotion. By maintaining the eye chart's strict hierarchy, spacing, and scale, the poster preserves its universal clarity while layering recognition, memory, and emotion.

My YNHD (Yeonhui-dong) Publication

Year: Spring 2025

Medium: Adobe InDesign, Perfect Binder

Dimensions: 15' x 15'

Description: This magazine centers on Yeonhui-dong, a quiet neighborhood in western Seoul that occupies a space between city and suburb, motion and pause. Yeonhui-dong is shaped not by spectacle, but by its subtle rhythms, narrow streets, and low-rise homes. The magazine explores this unique atmosphere through manipulated photographs and spatial studies that focus on mood, memory, and transition.

“You look like a Tomato” Filter

Year: Spring 2025

Medium: Visual Studio Code, GitHub

Description: Emphasizing fun and creativity, the site invites users to engage with the technology in a lighthearted way, offering a unique experience that encourages exploration and creativity. By blending coding skills with a touch of humor, this project showcases the delightful possibilities of web development and filters.

The Human Cube

Year: Spring 2025

Medium: Adobe InDesign, Adobe Illustrator

Dimensions: 7' x 7' x 7'

Description: The Human Cube is a book inspired by the visionary futurism of Pierre Cardin, whose Space Age designs of the 1960s redefined fashion. The Human Cube envisions clothing and color as extensions of space-age architecture. The theme celebrates Cardin's legacy as a designer who saw fashion as a total art form.

Two Designer Accordion Book

Year: Fall 2024

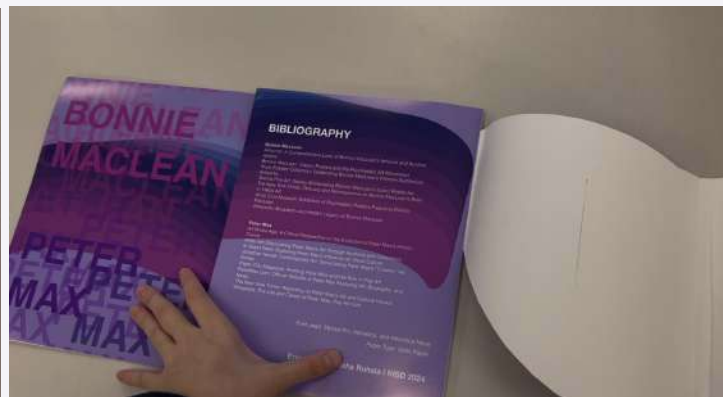

Medium: Adobe Illustrator, Adobe InDesign

Description: This accordion book explores the lives and work of two designers, one historical and one contemporary, through a detailed timeline that highlights their training, areas of interest, projects, and professional journeys. To visually unify the project, I designed an accordion book that reflects the psychedelic themes present in both artists' work.

“Flowerinject” Typeface

Year: Fall 2024

Medium: Adobe Illustrator, Adobe Photoshop

Description: This project explores the evolution by designing a custom lowercase Latin alphabet based on a flower-shaped grid system, a structure that introduces organic, feminine qualities to letterforms while maintaining the principles of reduction and abstraction that define graphic design. The process of developing this type system reinforced the essential design practice of simplifying and refining information into a functional visual language.

"An Alien on Earth" Visual System

Year: Fall 2024

Medium: Adobe Illustrator, Adobe After Effects

Description: This project explores the challenge of visual communication by abstracting a given object into a singular poster design without relying on direct representation or sequential storytelling. By utilizing color, shape, and composition, the design conveys the essence.

"My Name is Dokdo" Publication

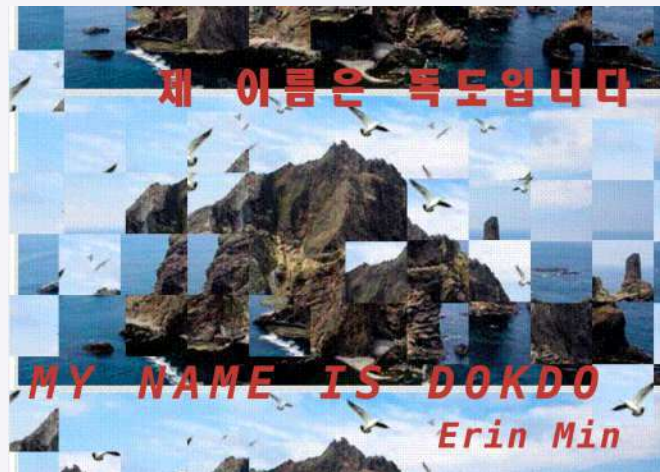

Year: Winter 2024

Medium: Adobe InDesign

Dimensions: 36' x 24'

Description: "My Name is Dokdo" is a thoughtfully crafted zine designed to educate students and educators about the complex and often controversial history of the island of Dokdo. My personifying of Dokdo, "My Name is Dokdo," is a thoughtfully crafted zine designed to educate students and educators about the complex and often-controversial history of the island of Dokdo.

78! Pop up Brand Identity

Year: Summer 2025

Medium: Adobe Illustrator

Description: This project culminated in the creation of a brand identity for 78!'s pop-up event. 78! is a contemporary fashion brand leveraging the dynamic interaction between culture and fashion to craft a visually compelling and meaningful design. Through this project, creating a visual identity for the brand was important in their first pop-up.

"I Love You Silence" Campaign

Year: Spring 2025

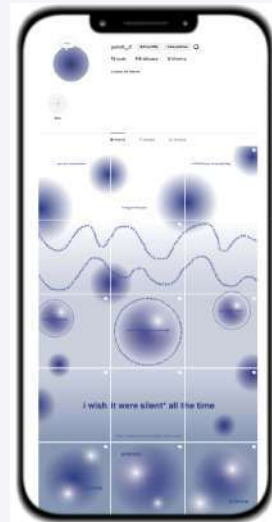

Medium: Adobe Illustrator, Adobe InDesign, Instagram

Description: This project, titled "I Love You, Silence," seeks to explore and convey the significance of silence as both a concept and a practice. Through the creation of a digital space, in the form of an Instagram account and an interactive physical flyer, this project emphasizes the visual representation of absence.

Minutes for Myself

Year: Spring 2025

Medium: Visual Studio Code, GitHub

Description: “Minutes for Myself” is a personal data visualization project that explores how I care for myself in the moments before sleep. By interacting with these visual elements, the viewer is invited to witness the rhythm of my daily routine, recognizing the balance between digital habits and restorative care.

Credit: Erin Min — Concept, Design, Coding

Portfolio Website

Year: Fall 2025

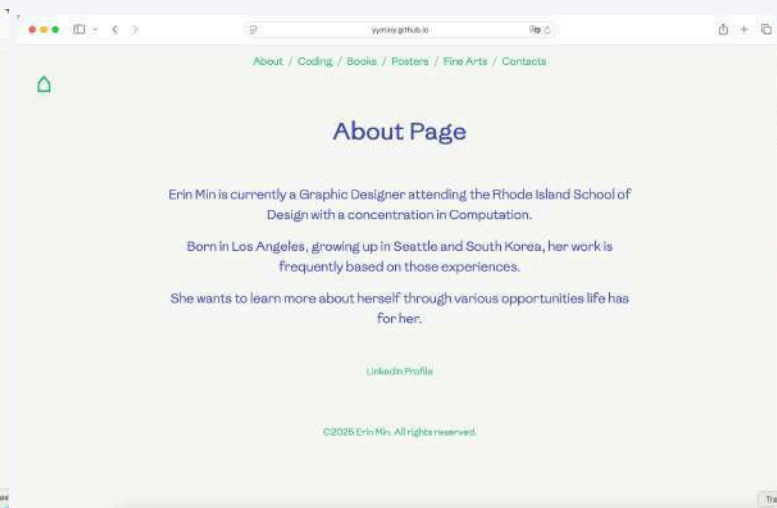

Medium: Visual Studio Code, GitHub

Description: My hand-coded portfolio website is both a showcase of my work and a reflection of my artistic identity. By choosing to code it myself rather than use templates, I give myself the freedom to design a space that feels personal, intentional, and true to my creative vision. In this way, the website strengthens both my personal and brand identity.

Composition Studies

Year: Fall 2024

Medium: Adobe Illustrator

Dimensions: 16' x 20'

Description: Inspired by the principles of Constructivism, this project explores the dynamic interplay of form and function through a strikingly asymmetric composition. The integration of letters, numerals, and punctuation fosters a sense of movement and energy, inviting viewers to engage with the artwork on multiple levels.
